SOFT SKILLS

- Resilience
- Problem-Solving
- Teamwork
- Strong Communication
- Adaptability

SKILLS

- React JS / NextJS
- Angular / Typescript
- Spring Boot / Java
- Version control system Git
- Microservices
- ASP.NET Core / C#
- Docker
- Unit test
- **English B2**

EDUCATION

BACHELOR OF COMPUTER SCIENCE

Universidad Nacional de Costa Rica

PROFILE

Full-Stack Developer with 5 years of hands-on experience building reliable, scalable software in agile teams. I focus on creating clean, maintainable solutions that align with both user needs and business goals. I've worked closely with product and development teams to deliver features, improve architecture, and uphold strong code quality through testing and reviews. Known for being detail-oriented and solution-driven, I bring technical insight, strong collaboration skills, and a mindset focused on continuous growth and delivering solid results.

EXPERIENCE

FULL STACK DEVELOPER AT THOROPASS, NEW YORK

March 2024 - Present

- Lead the frontend area while contributing across the full stack using React, GraphQL, and Django.
- Design and implement scalable, decoupled user interfaces and robust backend integrations.
- Develop complex features and deliver high-quality UI/UX and backend logic aligned with business goals.
- Support and mentor teammates on frontend best practices and full stack development.
- Collaborate cross-functionally to translate requirements into efficient technical solutions.
- Maintain code quality, performance, and scalability across both frontend and backend systems.

Tech Stack: NodeJs, Typescript, React JS, Django Angular 2, Microservices, Github, Jira, Confluence, Git, SQL Server, unit testing

EXPERIENCE

FULL STACK DEVELOPER AT HARRIS GBS, HEREDIA

September 2023 - March 2024

- Planned, developed, tested, deployed, and maintained digital web Hospital platform
- Gained experience in working with global healthcare standards such as FHIR.
- Designed and implemented new healthcare features for a hospital platform, adhering to FHIR standards.
- Provided mentorship and guidance to newly hired team members.
- Enhanced code-level design by applying best practices and design patterns where necessary, thereby reducing technical debt.

Tech Stack: NodeJs, Java Spring, NestJs, Typescript, React JS, Angular 2, Microservices, Azure DevOps, Jira, Confluence, Git, SQL Server, unit testing

FULL STACK DEVELOPER AT MGM MEDIA CONSULTING, FREELANCE

August 2022 - January 2024

- Planned, developed, tested, deployed, and maintained digital web Casinos platforms
- Effectively translated client requirements into application designs and systems requirements
- Develop integration between multiple third-party services.
- Rebranding of client's migration from Angular JS to React JS and new technologies

Tech Stack: NodeJs, NestJs, Typescript, React JS, Azure DevOps, Jira, Confluence, Git, SQL Server

SOFTWARE DEVELOPER AT ENCORA, HEREDIA

Octuber 2022 - July 2023

- Planned, developed, tested, deployed, and maintained web applications
- Effectively translated client requirements into application designs and systems requirements
- Migrate AngularJS modules to React JS components
- Create a microservice from scratch to handle the patients of the application
- Add new features with React Js and .net core to one of the principal modules of the application
- Migrate microservice that had .Net Core 5 to .Net Core 6
- Work as a team to give better solutions to tough situations
- Create, Update, and refactor APIs
- Add unit testing to new and legacy code

Tech Stack: ASP.NET Core, Java Spring, Angular 2, Typescript, React JS, Microservices, Azure DevOps, Jira, Confluence, Git, SQL Server

FULL STACK DEVELOPER AT GORILLA LOGIC, SAN JOSE

August 2021 — October 2022

- Effectively coded software changes and alterations based on specific design specifications.
- Worked productively with the Product Team to understand requirements and provide architecture solutions
- Create a full-stack feature about a dynamic dashboard that the company wanted to give more value to the clients using .Net core and Angular
- Propose a solution and design to new requirements to improve the value to the clients
- Work as a team to give betters solutions to tough situations
- Create, Update, and refactor APIs
- Add unit testing to new and legacy code

Tech Stack: ASP.NET Core, Java Spring, Angular 2, Typescript, React JS, Microservices, Azure DevOps, Jira, Confluence, Git, SQL Server

FULL STACK DEVELOPER AT LISTICA, LIBERIA
January 2020 — July 2021

- Solving architectural issues with Design Patterns and the best practices within the technologies used in those projects
- Create from scratch and lead a whole rental cart application using .net core and ReactJS
- Propose and develop a scalable application using design patterns to give a flexible solution
- Create, Update, and refactor APIs
- Add unit testing to new and legacy code
- Migrate a one-tenant application to a multi-tenant application to be able to reduce the development time for new clients
- Mentor interns

Tech Stack: ASP.NET Core, Java Spring, React JS, Redux, Typescript, Angular 2, Angular JS, Git, MySql, SQL Server, Bitbucket, Jira, Confluence
